Professional Summary

Recent B.Tech Information Technology graduate from Cochin University of Science and Technology (CUSAT) with knowledge of Python, SQL, Power BI, and data analytics. Experienced in data cleaning, visualization, dashboard development, and working with structured datasets through academic projects and an internship. Interested in Data Science and currently building my skills in machine learning and AI. A quick learner with strong analytical and problem-solving abilities, eager to contribute and grow in a data-driven environment.

Education

Cochin University of Science and Technology

Bachelor of Technology In Information Technology

CGPA: 7.84/10

Graduated: April 2026

VHMHSS Morayur

Higher Secondary Education

Percentage: 95.6%

Experience

Data Analytics Intern | Bridgeon Solution LLP

- Worked with structured datasets to analyze business performance using Power BI
- Cleaned and transformed data using Power Query for accurate reporting
- Collaborated with team members to understand business requirements and deliver analytical solutions
- Developed dashboards and KPI reports to support data-driven decision making

Projects

Sales Data Analytics Dashboard | Power BI, DAX, Power Query

GitHub Repository

- Built interactive dashboards and reports using Power BI for sales performance analysis.
- Cleaned and transformed raw datasets using Power Query and established relational data models.
- Developed advanced DAX calculations, KPIs, and time-based analytical reports.
- Implemented slicers, drill-through features, and visual analytics for improved user interaction.

Family Health Management Website | HTML, CSS, JavaScript

GitHub Repository

- Designed and developed a responsive multi-page healthcare-focused web application.
- Implemented features including BMI calculator, medical history forms, and visit tracking.
- Developed registration and login pages with frontend validation techniques.
- Improved usability with responsive layouts and clean UI design principles.

Self-Extensible AI Platform | Python, Neo4j, FastAPI, LLMs

- Developed an AI platform capable of dynamically creating and integrating tools based on user requirements .
- Implemented a Knowledge Graph RAG system using Neo4j for intelligent information retrieval
- Added secure code validation and execution checks before running AI-generated code.
- Integrated web knowledge retrieval and LLMs to improve adaptability and automation.

Technical Skills

Programming Languages: Python, C++, C, SQL

Data Engineering: Data Cleaning, Data Transformation, Power Query, DAX, Data Modeling

Core Concepts: Data Structures, DBMS, Object-Oriented Programming, Operating System, Computer Networks

Tools & Platforms: GitHub, VS Code, PyCharm, Figma

Soft Skills: Problem Solving, Team Collaboration, Adaptability, Time Management
