Data Engineering: ETL, Power Query, DAX

Databases: MySQL, PostgreSQL, MongoDB

Visualization: Power BI, Matplotlib

Cloud and DevOps: AWS, Docker, Git, CI/CD

APIs and Backend: REST API, FastAPI

PROFESSIONAL EXPERIENCE

Data Analyst | TechNova Analytics Pvt. Ltd. | Bengaluru, Karnataka

June 2024 – Present

- Analyzed sales and customer datasets using SQL and Python to identify trends, anomalies, and performance drivers.
- Built Power BI dashboards and KPI reports used by business stakeholders for weekly performance reviews.
- Cleaned and transformed raw datasets using Python, Pandas, Power Query, and SQL.
- Automated recurring reporting workflows, reducing manual reporting effort by approximately 30%.
- Collaborated with product and business teams to translate requirements into actionable analytical reports.

Data Analyst Intern | InsightWorks Solutions | Kochi, Kerala

January 2024 – May 2024

- Prepared and validated datasets for business reporting and exploratory analysis.
- Created Excel and Power BI reports covering revenue, customer, and operational KPIs.
- Performed data quality checks and documented recurring data issues.
- Supported senior analysts with SQL queries and ad hoc business analysis.

EDUCATION

Bachelor of Technology in Information Technology | Cochin Institute of Technology | Kochi, Kerala

Graduated: April 2023 | CGPA: 8.2/10

Higher Secondary Education | Government Higher Secondary School | Kerala | 2020

CERTIFICATIONS

- Google Data Analytics Professional Certificate | Coursera | 2024 | Credential ID: GDA-2024-1842
- Microsoft Certified: Power BI Data Analyst Associate | Microsoft | 2025 | Credential ID: PBI-582941
- AWS Certified Cloud Practitioner | Amazon Web Services | 2025 | Credential ID: AWS-CP-731924
- SQL for Data Science | Udemy | 2023 | Certificate ID: UDEMY-SQL-39184

PROJECTS

Retail Sales Analytics Dashboard | Python, SQL, Power BI

- Built an interactive dashboard to analyze revenue, product performance, regional sales, and customer trends.
- Designed an ETL workflow to clean and transform transactional data before visualization.

Customer Churn Analysis | Python, Pandas, Scikit-learn

- Performed exploratory data analysis and feature preparation on customer usage data.
- Developed a machine learning workflow to identify customers with higher churn risk.

COURSEWORK

Data Analysis, Database Systems, Machine Learning, Statistics, Cloud Computing

ACHIEVEMENTS

- Received an internal recognition award for automating monthly reporting.
- Presented a Power BI analytics dashboard to a cross-functional business team.
