Professional Summary

Motivated Information Technology graduate with a strong foundation in Computer Networks, Operating Systems, Database Management Systems, and System Administration. Skilled in Python, C++, SQL, networking fundamentals (TCP/IP, DNS, DHCP), and troubleshooting technical issues. Passionate about enterprise infrastructure, networking, servers, storage technologies, and delivering reliable IT support. Quick learner with strong analytical and problem-solving abilities, eager to contribute to HCLTech's Networking, Mobility, Storage & Server team.

Education

Cochin University of Science and Technology

Bachelor of Technology In Information Technology

CGPA: 7.84/10

Graduated: April 2026

VHMHSS Morayur

Higher Secondary Education

Percentage: 95.8%

Relevant Coursework

- Computer Networks
- Operating Systems
- Database Management Systems
- Computer Organization
- Data Structures & Algorithms
- Object-Oriented Programming
- Network Security Fundamentals

Experience

Data Analytics Intern | Bridgeon Solution LLP

- Worked with enterprise datasets and ensured data accuracy through cleaning and validation.
- Collaborated with cross-functional teams to understand technical requirements.
- Performed troubleshooting during dashboard development and report deployment
- Developed analytical reports using Power BI while maintaining data integrity.
- Improved problem-solving and debugging skills through real-world business projects.

Projects

Self-Extensible AI Platform | Python, Neo4j, FastAPI, LLMs

- Developed an AI platform capable of dynamically creating and integrating tools based on user requirements .
- Implemented a Knowledge Graph RAG system using Neo4j for intelligent information retrieval
- Added secure code validation and execution checks before running AI-generated code.
- Integrated web knowledge retrieval and LLMs to improve adaptability and automation.

Sales Data Analytics Dashboard | Power BI, DAX, Power Query

[GitHub Repository](#)

- Built interactive dashboards and reports using Power BI for sales performance analysis.
- Cleaned and transformed raw datasets using Power Query and established relational data models.
- Developed advanced DAX calculations, KPIs, and time-based analytical reports.
- Implemented slicers, drill-through features, and visual analytics for improved user interaction.

Family Health Management Website | HTML, CSS, JavaScript

[GitHub Repository](#)

- Designed and developed a responsive multi-page healthcare-focused web application.
- Implemented features including BMI calculator, medical history forms, and visit tracking.
- Developed registration and login pages with frontend validation techniques.
- Improved usability with responsive layouts and clean UI design principles.

Technical Skills

Programming Languages: Python, C++, C, SQL

Networking: TCP/IP, OSI Model, DNS, DHCP, HTTP, HTTPS, Routing & Switching Fundamentals, IPv4 Addressing, Subnetting

Operating System: Windows, Linux

Database: MySQL, DBMS

Core Concepts: Data Structures, DBMS, Object-Oriented Programming, Operating System, Computer Networks

Tools & Platforms: GitHub, VS Code, PyCharm, Figma

Soft Skills: Problem Solving, Team Collaboration, Adaptability, Time Management, Troubleshooting
